Lipid Synthesis, Transport, and Signalling / Lipides : synthèse, transport et signalisation

MINIREVIEWS / MINISYNTHÈSES

Christina C. Leslie Regulation of arachidonic acid availability for eicosanoid production 1

Marcia M. Wright, Alicia G. Howe, and Vanina Zaremberg Cell membranes and apoptosis: role of cardiolipin, phosphatidylcholine, and anticancer lipid analogues 18

Norma Marchesini and Yusuf A. Hannun Acid and neutral sphingomyelinases: roles and mechanisms of regulation 27

Kellie J. Sims, Stefka D. Spassieva, Eberhard O. Voit, and Lina M. Obeid Yeast sphingolipid metabolism: clues and connections 45

George M. Carman and Michael C. Kersting Phospholipid synthesis in yeast: regulation by phosphorylation 62

M. Stephen Trent Biosynthesis, transport, and modification of lipid A 71

Vesa M. Olkkonen and Timothy P. Levine Oxysterol binding proteins: in more than one place at one time? 87

REVIEWS / SYNTHÈSES

Grant M. Hatch Cell biology of cardiac mitochondrial phospholipids 99

Jean E. Vance and Dennis E. Vance Phospholipid biosynthesis in mammalian cells 113

Andrew F.G. Quest, Lisette Leyton, and Mario Párraga Caveolins, caveolae, and lipid rafts in cellular transport, signaling, and disease 129

Ying-Jie Lu, Yong-Mei Zhang, and Charles O. Rock Product diversity and regulation of type II fatty acid synthases 145

Dennis R. Voelker Genetic analysis of intracellular aminoglycerophospholipid traffic 156

May Faraj, Hui Ling Lu, and Katherine Cianflone Diabetes, lipids, and adipocyte secretagogues 170

Meenakshi Sundaram, Harold W. Cook, and David M. Byers The MARCKS family of phospholipid binding proteins: regulation of phospholipase D and other cellular components 191

Ruth McPherson and Andre Gauthier Molecular regulation of SREBP function: the Insig–SCAP connection and isoform-specific modulation of lipid synthesis 201

Patrick C. Choy, Yaw L. Siow, David Mymin, and Karmin O Lipids and atherosclerosis 212

Mark McDermott, Michael J.O. Wakelam, and Andrew J. Morris Phospholipase D 225

Sheri M. Routt and Vytas A. Bankaitis Biological functions of phosphatidylinositol transfer proteins 254

April / Avril

REVIEW / SYNTHÈSE

Scott M. Dehm and Keith Bonham *SRC* gene expression in human cancer: the role of transcriptional activation 263

ARTICLES / ARTICLES

Julia Xu, Mary A.A. McRae, Scott Harron, Beatrice Rob, and Reuben E. Huber A study of the relationships of interactions between Asp-201, Na^+ or K^+, and galactosyl C6 hydroxyl and their effects on binding and reactivity of β-galactosidase 275

Kevin Larade and Kenneth B. Storey Anoxia-induced transcriptional upregulation of *sarp*-19: cloning and characterization of a novel EF-hand containing gene expressed in hepatopancreas of *Littorina littorea* 285

Emi Mishiro, Ming-Yih Liu, Yoichi Sakakibara, Masahito Suiko, and Ming-Cheh Liu Zebrafish tyrosylprotein sulfotransferase: molecular cloning, expression, and functional characterization 295

© 2004 NRC Canada

F.-O. McDuff, A. Doucet, and M. Beauregard Low concentration of guanidine hydrochloride induces the formation of an aggregation-prone state in α-urease 305

S.M.M. Vasconcelos, R.F. Pereira, R.S. Alves, A.C.V. Arruda Filho, L.M.V. Aguiar, D.S. Macedo, R.M. Freitas, M.G.R. Queiroz, F.C.F. Sousa, and G.S.B. Viana Effects of ethanol and haloperidol on plasma levels of hepatic enzymes, lipid profile, and apolipoprotein in rats 315

Hong-Chen Wang, Yan-Rong Su, Ke-Jun Han, Xue-Wen Pang, Ji-Run Peng, Bin Liang, Shan Wang, and Wei-Feng Chen Multiple variants and a differential splicing pattern of kinectin in human hepatocellular carcinoma 321

Xiao-Yun Wang, Fan-Guo Meng, and Hai-Meng Zhou The role of disulfide bonds in the conformational stability and catalytic activity of phytase 329

Arturo Barrón-González and Ivone Castro Romero Re-expression of estrogen receptor α using a tetracycline-regulated gene expression system induced estrogen-mediated growth inhibition of the MDA-MB-231 breast cancer cell line 335

Joanna Summerscales and John F. Dawson Probing *Dictyostelium* severin structure and function by cross linking to actin 343

June / Juin

MINIREVIEW / MINISYNTHÈSE

Kenneth A. Hoekstra, David V. Godin, and Kimberly M. Cheng Protective role of heme oxygenase in the blood vessel wall during atherogenesis 351

ARTICLES / ARTICLES

Ji-Cheng Pan, Zhen-Hang Yu, En-Fu Hui, and Hai-Meng Zhou Conformational change and inactivation of arginine kinase from shrimp *Feneropenaeus chinensis* in oxidized dithiothreitol solutions 361

Doris Kloor, Katrin Karnahl, and Jost Kömpf Characterization of glycine *N*-methyltransferase from rabbit liver 369

Marie-Eve Habel, Mathieu Drouin, and Daniel Jung Maintenance of Epstein–Barr virus-derived episomal vectors in the murine Sp2/0 myeloma cell line is dependent upon exogenous expression of human EBP2 375

A.A. Azenabor, S. Yang, G. Job, and O.O. Adedokun Expression of iNOS gene in macrophages stimulated with 17β-estradiol is regulated by free intracellular Ca^{2+} 381

Carrie N. Lyons, Scot C. Leary, and Christopher D. Moyes Bioenergetic remodeling during cellular differentiation: changes in cytochrome *c* oxidase regulation do not affect the metabolic phenotype 391

Xue-Fan Cui, Tadaatsu Imaizumi, Hidemi Yoshida, Ernest C. Borden, and Kei Satoh Retinoic acid-inducible gene-I is induced by interferon-γ and regulates the expression of interferon-γ stimulated gene 15 in MCF-7 cells 401

Todd C. Sutherland, Michael J. Dinsmore, Heinz-Bernhard Kraatz, and Jeremy S. Lee An analysis of mismatched duplex DNA unzipping through a bacterial nanopore 407

August / Août

25th International West Coast Chromatin and Chromosomes Conference / 25e conférence internationale de la côte Ouest sur la chromatine et les chromosomes

MINIREVIEWS / MINISYNTHÈSES

Lingyi Chen and Jonathan Widom Molecular basis of transcriptional silencing in budding yeast 413

Richard A. Singer and Gerald C. Johnston The FACT chromatin modulator: genetic and structure/function relationships 419

Nicoletta Corbi, Valentina Libri, Annalisa Onori, and Claudio Passananti Synthetic zinc finger peptides: old and novel applications 428

Adelina Prado, Isbaal Ramos, Lindsay J. Frehlick, Arturo Muga, and Juan Ausió Nucleoplasmin: a nuclear chaperone 437

John D. Moore and Jocelyn E. Krebs Histone modifications and DNA double-strand break repair 446

Alexandre M. Erkine Activation domains of gene-specific transcription factors: are histones among their targets? 453

Lin Li, Shihua He, Jian-Min Sun, and James R. Davie Gene regulation by Sp1 and Sp3 460

Tony Nolan and Carlo Cogoni The long hand of the small RNAs reaches into several levels of gene regulation 472

Sara S. Dirscherl and Jocelyn E. Krebs Functional diversity of ISWI complexes 482

REVIEWS / SYNTHÈSES

Deanna Dryhurst, Anita A. Thambirajah, and Juan Ausió New twists on H2A.Z: a histone variant with a controversial structural and functional past 490

Chiara Mondello and A. Ivana Scovassi Telomeres, telomerase, and apoptosis 498
